Empowering Schools with Smarter Energy Solutions from Corona Energy

22 November 2024

Corona Energy, a UK-based energy supplier, offers tailored solutions to help schools manage their energy needs efficiently. By providing fixed and flexible contracts, dedicated account management, and accurate billing, Corona Energy ensures that educational institutions can focus on their primary mission—educating students—without the added stress of energy management.

Customised Energy Contracts

Understanding that each school has unique energy requirements, Corona Energy offers both fixed and flexible contracts. Fixed contracts provide budget certainty, allowing schools to plan their finances without worrying about fluctuating energy prices. Flexible contracts, on the other hand, offer adaptability, enabling schools to adjust their energy usage and costs in response to changing needs.

Dedicated Account Management

Schools partnering with Corona Energy benefit from a dedicated account manager who serves as a single point of contact for all energy-related inquiries. This personalized service ensures that schools receive prompt and knowledgeable support, facilitating efficient energy management and swift resolution of any

issues that may arise.

Accurate and Timely Billing

Accurate billing is crucial for schools to maintain financial stability. Corona Energy emphasizes precise and timely billing practices, providing schools with clear and understandable invoices. This transparency helps schools monitor their energy consumption and expenditures effectively, aiding in budget planning and cost control.

Online Account Management with myCorona

To further streamline energy management, Corona Energy offers ‘myCorona,’ an online platform accessible 24/7. Through myCorona, schools can submit meter readings, monitor energy usage, and review pricing information at their convenience. This digital tool empowers schools to take control of their energy consumption, identify areas for improvement, and implement energy-saving measures.

Commitment to the Public Sector

Corona Energy has a specialized team dedicated to serving public sector organizations, including schools. This team understands the unique challenges faced by educational institutions and works collaboratively to develop energy solutions that align with each school’s specific needs and objectives.

By partnering with Corona Energy, schools can achieve efficient energy management, leading to cost savings and a reduced environmental footprint. This partnership allows schools to allocate more resources toward enhancing educational outcomes, ultimately benefiting students and the broader community.
