

# T150 Energy aim to put £1m back into the Care, Education & Charity sectors

19 March 2024

**Our aim is to put a million pounds back into the Care, Education & Charity sectors, as part of our 'Million Pound Mission'. T150 Energy through our 'Payback Scheme' are giving back £100's to £10,000's back into the Care & Education sectors to use as they wish.**

In November 2020 I was told I was at risk of 'sudden death' and had six months left to live. Thanks to the amazing work of the NHS and various charities this what not the case. The 'Payback Scheme' was designed to put 100s to 10,000s of pounds back to the sectors that educate and care for us when we need it most, when they review their energy costs with us.

For trusts and academies with multiple locations this could run into £100,000s, to be used as they see fit and if they are a registered charity, this can be done as a charitable donation as well.

T150 Energy is here to help guide businesses through the ever-changing prices and terms of energy acquisition, to achieve the best value short and long-term electricity and gas contracts they can, as well as receive valuable funds to counter ever increasing costs.
